PERSONAL STATEMENT

Working with web development since 2019, I developed apps and an e-commerce website, which has thousands of users per month. Always concerned with User Experience, clean code and performance.

WORK EXPERIENCE

System Analyst
At RPC - Rede Paranaense de Comunicação
Jan 2022 - Present

- Deployment of serverless applications to AWS.

- Development of AWS Lambda functions.

- Development and maintenance of React/NodeJS applications.

Front-end Web Developer
At DBM Contact Center
May 2021 - Jan 2022

- I worked as the lead front-end developer to create a new PABX system.

- Front-end technologies used: Angular with Bootstrap

Fullstack Web Developer
At Esallabs
August 2020 - May 2021

- Developed the Esalcorp app, which is used to manage the company's internal inventory, using Ionic framework with Angular.

- Developed Esalflores e-commerce website, which connects with the company's ERP api. The website reaches thousands of users per month.

- Technologies used: Angular with Bootstrap, Laravel.

Junior Developer
At Viasoft Korp
November 2019 - May - 2020

- Starting as a QA intern, my main task was to build SQL queries and guarantee the good functionality of the program.

- As a junior developer, I developed and ensured maintenance of the ERP system, SQL queries and Unit Tests.
